

The USDA Forest Service Presents: A Free Educator's Workshop in DC June 7, 2019

EDUBAT
Education Taking Flight

Project EduBat inspires, excites, and activates students to help out bats and the environment through inquiry-based learning!

California Leaf-nosed Bat

Bat Conservation International

- Become a bat biologist by weighing and measuring “bats;”
- Calculate the value of our insect-eating in bats that save farmers billions every year;
- Explore how changes in the environment can disrupt an ecosystem and threaten the health and survival of wildlife populations;
- Explore the scientific methods used to investigate how infectious diseases spread, and much more!

Bats are amazing animals that eat tons of insects, pollinate flowers, and spread seeds that grow new plants and trees. Yet, bats are in decline nearly everywhere they are found. A new disease, White-Nose Syndrome, has killed over six million bats in just six years. **BATS NEED YOUR HELP!**

Date:

Friday, June 7, 2019

Time:

9:30 am – 1:30 pm

Location:

USDA Forest Service Yates Building located on the corner of 14th St SW and Independence Ave (physical address: 201 14th St SW) - **Pinchot Training Room** on the 2nd floor

Our award winning K-12 curriculum is aligned with **national next generation science standards** and **common core state standards**.
